

Ridgefield Pits Technical Oversight Group Meeting

MEETING AGENDA

January 28, 2020, 9-12 pm

Lower Columbia Fish Recovery Board- Room 102

11018 NE 51st Cir

Vancouver, WA 98682

Purpose- to summarize the main findings from physical conditions assessments and to develop restoration goals and actions. The results from this meeting will be used to form restoration alternatives.

Prior meetings- Prior meetings have provided a foundation for restoration efforts going forward. In those meetings we have discussed:

- landownership
- fisheries
- historical conditions (physical/landscape conditions)
- habitat conservation plan

Summaries of the meetings, and various technical documents, can be found on the Estuary Partnership's .FTP site- http://s458607291.onlinehome.us/FTP/RidgefieldPits_Working_Group/. Please see Paul or call him (503.705.0476) if you are having trouble accessing this.

Recap. project area and site conditions- Presentation

- summarize main findings from the recent Draft Geomorphic Report (October 2019)
- summarize fisheries, temperature & hydrology findings

Project goals- Agreeing on project goals, actions and targets is a critical step in moving forward with developing restoration alternatives. We have developed some examples of project goals, actions and targets. **This is included in a separate document.** – *Group discussion and activity.*

Break- ???

Project actions- *Group discussion and activity* related to developing project actions.

Timeline/details of upcoming meetings
